Management for Optimized Virtual Environments AntiVirus (MOVE AntiVirus) Essentials

Education Services eLearning course

Introduction

This course will provide a background in interface and functions of Management for Optimized Virtual Environments AntiVirus (MOVE AntiVirus). Topics covered in this course include general information about the product, setup and configuration, rules and policies used in MOVE AntiVirus, and some troubleshooting tips for the product.

Course Goals

Upon completion of this course, you will be able to:

- Identify the purpose of MOVE
- Locate critical MOVE interfaces in ePO
- Locate critical MOVE interfaces in VMWare products
- Install and deploy MOVE in ePO

Audience

System and network administrators, security personnel, auditors, and/ or consultants concerned with network and system security should take this course.

Recommended Pre-Work

It is recommended that students have a working knowledge of Microsoft Windows administration, system administration concepts, a basic understanding of computer security concepts, and a general understanding of internet services.

It is also recommended to have working knowledge of ePO®, and virtual network environments.

- Uninstall MOVE from both VMWare and ePO

- Analyze the impact of implementing an OAS policy

- Establish automatic provisioning

- Create a MOVE antivirus deployment

- Create a MOVE dashboard

- Troubleshoot basic issues
