Trellix Cloudvisory

Trellix Cloudvisory is a one stop shop for ensuring visibility, compliance, and governance for cloud assets in multi-cloud environments.

In today's day and age, managing multi-clouds environments is the ultimate eventuality for organizations. Though commitment to cloud security is growing but managing it remains a complex affair due to use of different cloud platforms and dynamic cloud infrastructure.

Hybrid cloud and multicloud will drive ongoing IAM architecture maintenance/ evolution.[1]

Remote work is placing greater demand on smarter access controls for the organizations.

With IAM Policy Inspector, Trellix Cloudvisory helps track, monitor, & manage multi-cloud accounts.

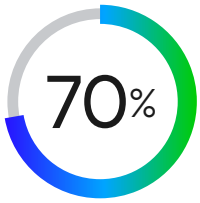
Strict IAM controls for users and identities within ever evolving cloud environments, is the result.

Through 2025, more than 99% of cloud breaches will have a root cause of preventable misconfigurations or mistakes by end users.[2]

A vulnerability in the way cloud assets are structured, can pose a very serious cyber threat.

Trellix Cloudvisory runs continual assessments to ensure – assets are set up correctly, processes across the board are secure, storage is proper and excessive permissions are not granted.

With Trellix Cloudvisory around, misconfigurations are a thing of the past.

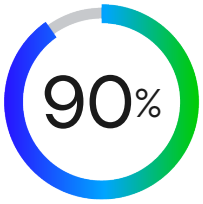


By 2023, 70% of all enterprise workloads will be deployed in cloud infrastructure and platform services.[3]

That said, to deal with speed, scale, complexity, and management of multi-cloud environments cloud-native offerings are apt.

Trellix Cloudvisory offers single-pane-of-glass visibility and control for physical machines, virtual machines, containers and serverless workloads, regardless of location.

This gets amplified with native integration with all the leading cloud platforms and cloud surface landscape visibility with recommendations on probable threat vectors, along the way.



By 2025, 90% of businesses will have a multi-cloud solution in place.[4]

And the result is much larger cloud surface with strict compliance & privacy regulations across the board and large penalties for probable data breaches.

With Compliance check inspector, Trellix Cloudvisory can help and continually adher to GDPR, HIPPA, NIST, PCI, S3 Bucket fixes. Terraform API's on the other hand helps identify and address vulnerabilities early in the process before they impact infrastructure.

Trellix Cloudvisory is the only comprehensive solution for cloud-native, multi-cloud governance, enforcing 1817+ compliance checks based on industry leading security standards and frameworks, making it easier for a centralized team to define visibility, compliance, data security and threat protection norms.

Trellix Cloudvisory delivers a complete cloud security solution through cloud-native integrations and controls across multi-cloud environments for continuous visibility, compliance, and governance to simplify cloud security efforts.
