**ABOUT SEMPERIS** 

## Foundational identity security

Identity-driven cyber resilience and threat mitigation for hybrid and multi-cloud environments

5.0 \*\*\*

#### The world's biggest brands trust Semperis

### 1004 million

Identities protected by Semperis (and counting)

#1 health system in the US, top 5 in the world

2/3 top consulting firms in the world

2/3 top airlines in the world

#1 and #5 big box retailer in the world

#1 bank in Europe. #2 bank in the U.S.

Top 5
property
insurer in
the U.S. #2
auto insurer

**DOMAIN EXPERTISE** 

## 150+ years' Microsoft MVP experience

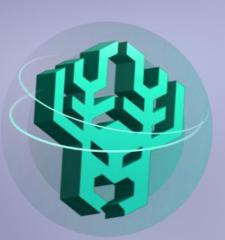

Microsoft Enterprise Cloud Alliance | Microsoft Accelerator Alumni Azure Co-sell Partner | Microsoft Intelligent Security Association

No vendor or services provider can outmatch Semperis' collective Microsoft MVP experience in Directory Services and Group Policy

#### The team behind Purple Knight

Purple Knight is a free AD cybersecurity assessment tool built and managed by Semperis' threat research team

#### The team behind Forest Druid

Forest Druid is a first-of-its-kind Tier 0 attack path discovery tool for Active Directory environments

#### **Hybrid Identity thought leaders**

Semperis hosts the award-winning Hybrid Identity Protection conference and podcast series

**KEYS TO THE KINGDOM** 

# If Active Directory isn't secure, nothing is

- 80% of all breaches involve credential abuse
- Systemic weakness make AD a soft target
- Cloud identity extends from AD
- Zero Trust model assumes hybrid AD integrity

For 90% of enterprises, identity starts with AD

### semperis

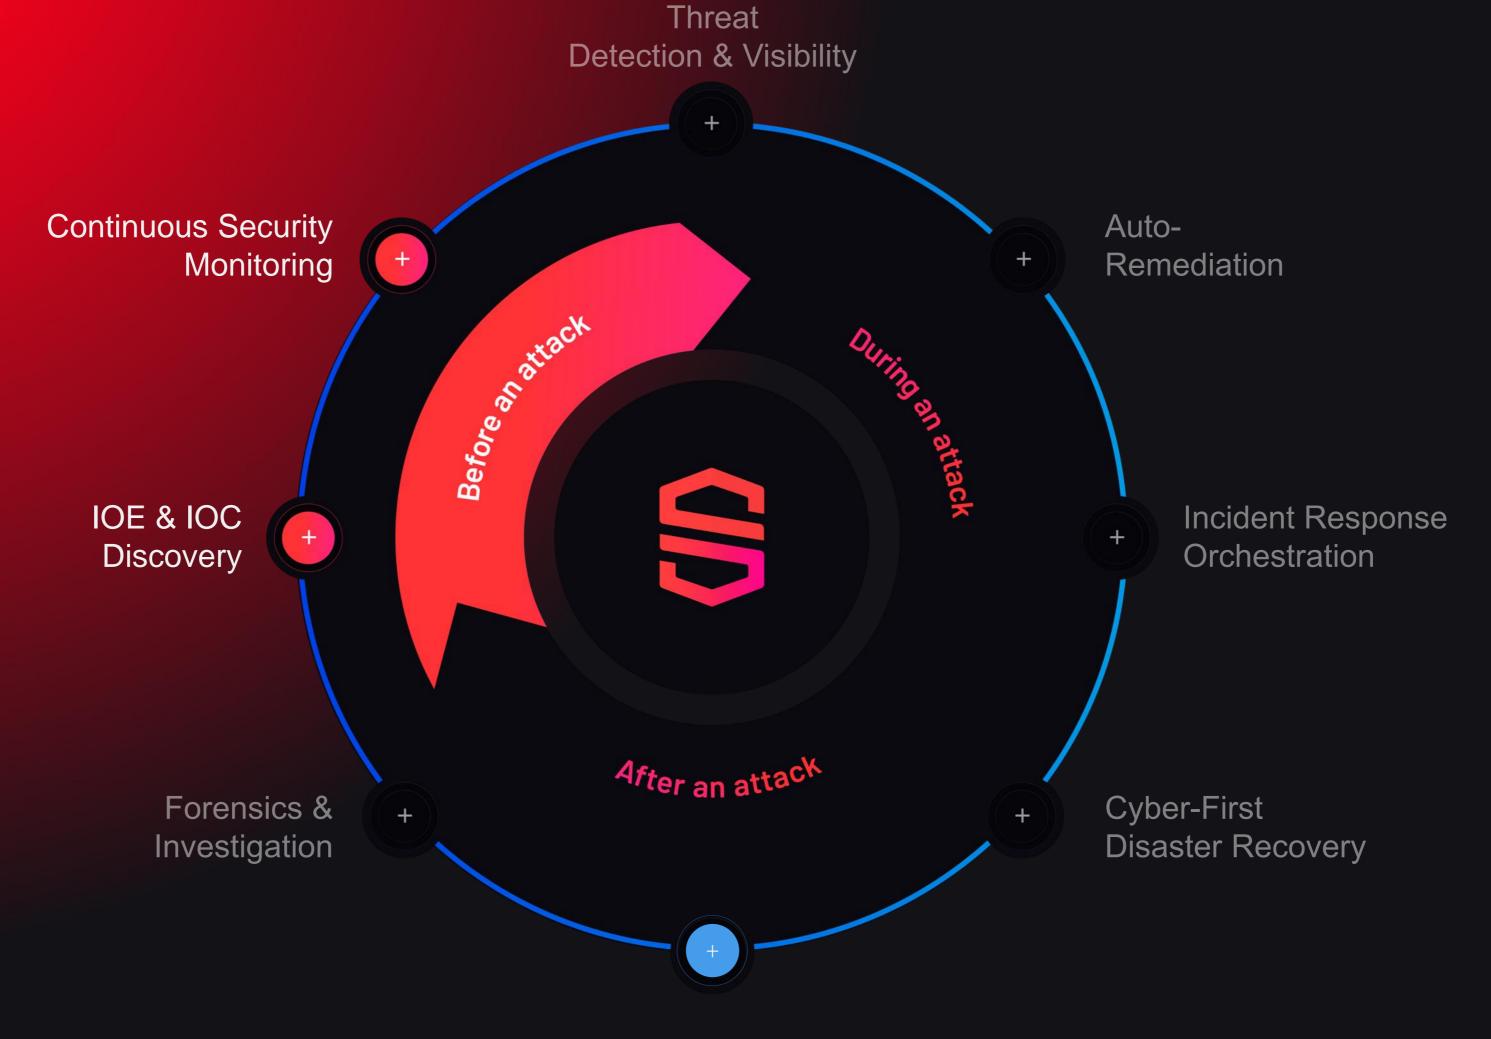

**FOUNDATIONAL IDENTITY SECURITY** 

## So, what does it take to protect hybrid AD?

(AD and Entra ID)

### Semperis

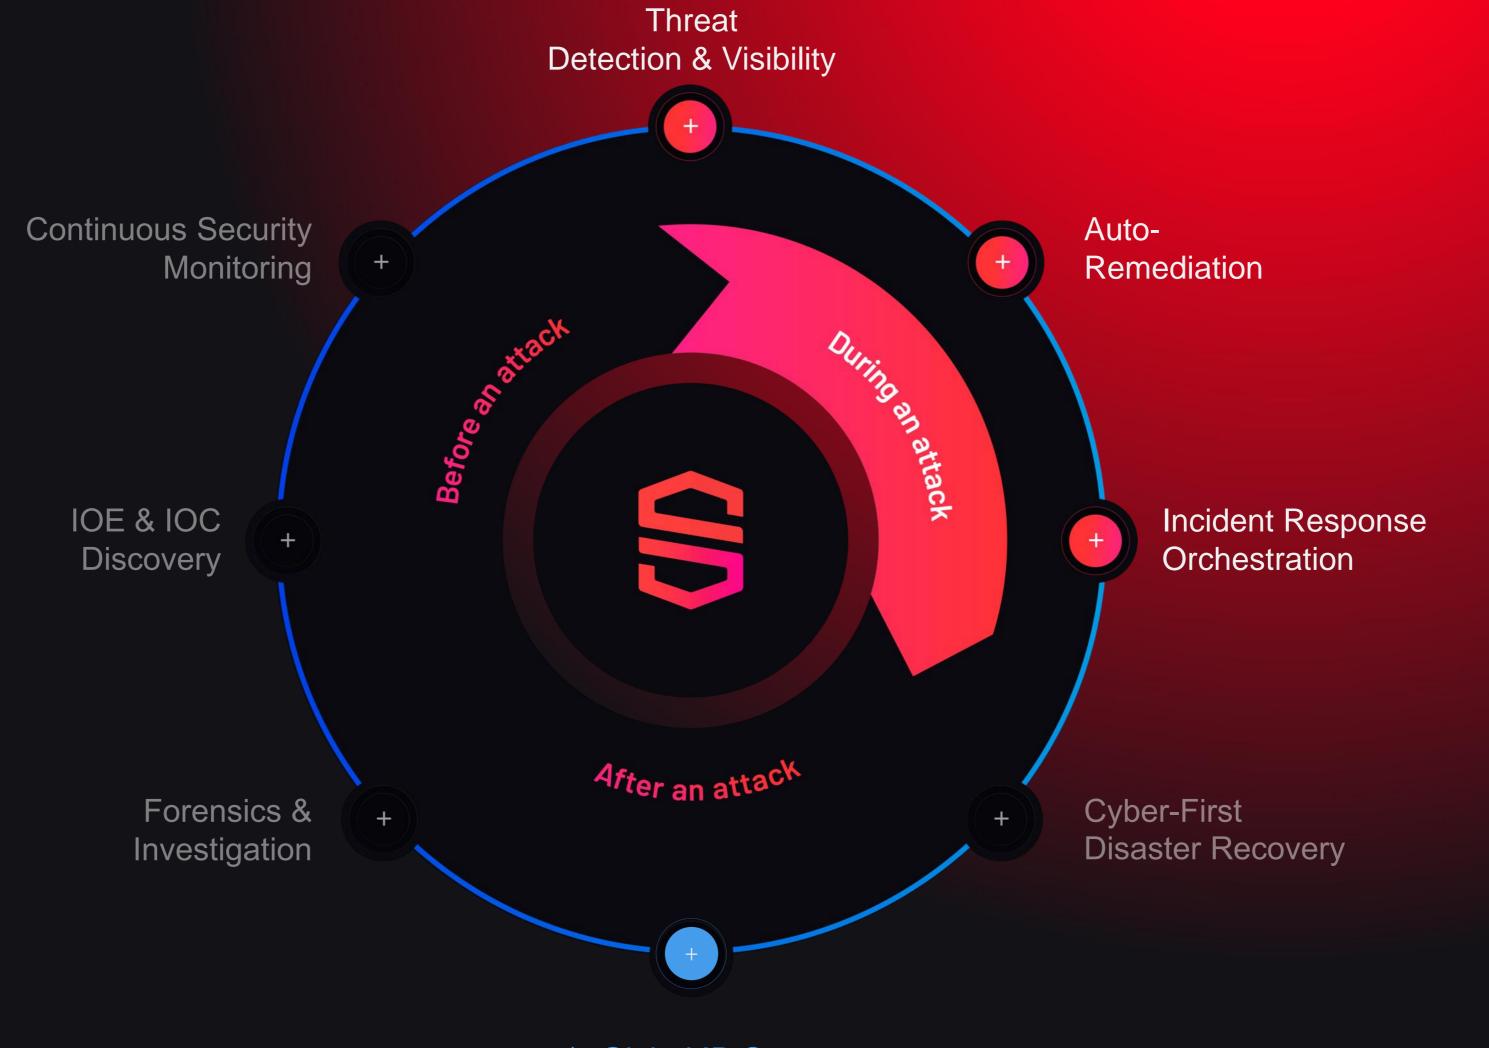

PRE attack

24/7 Global IR Support

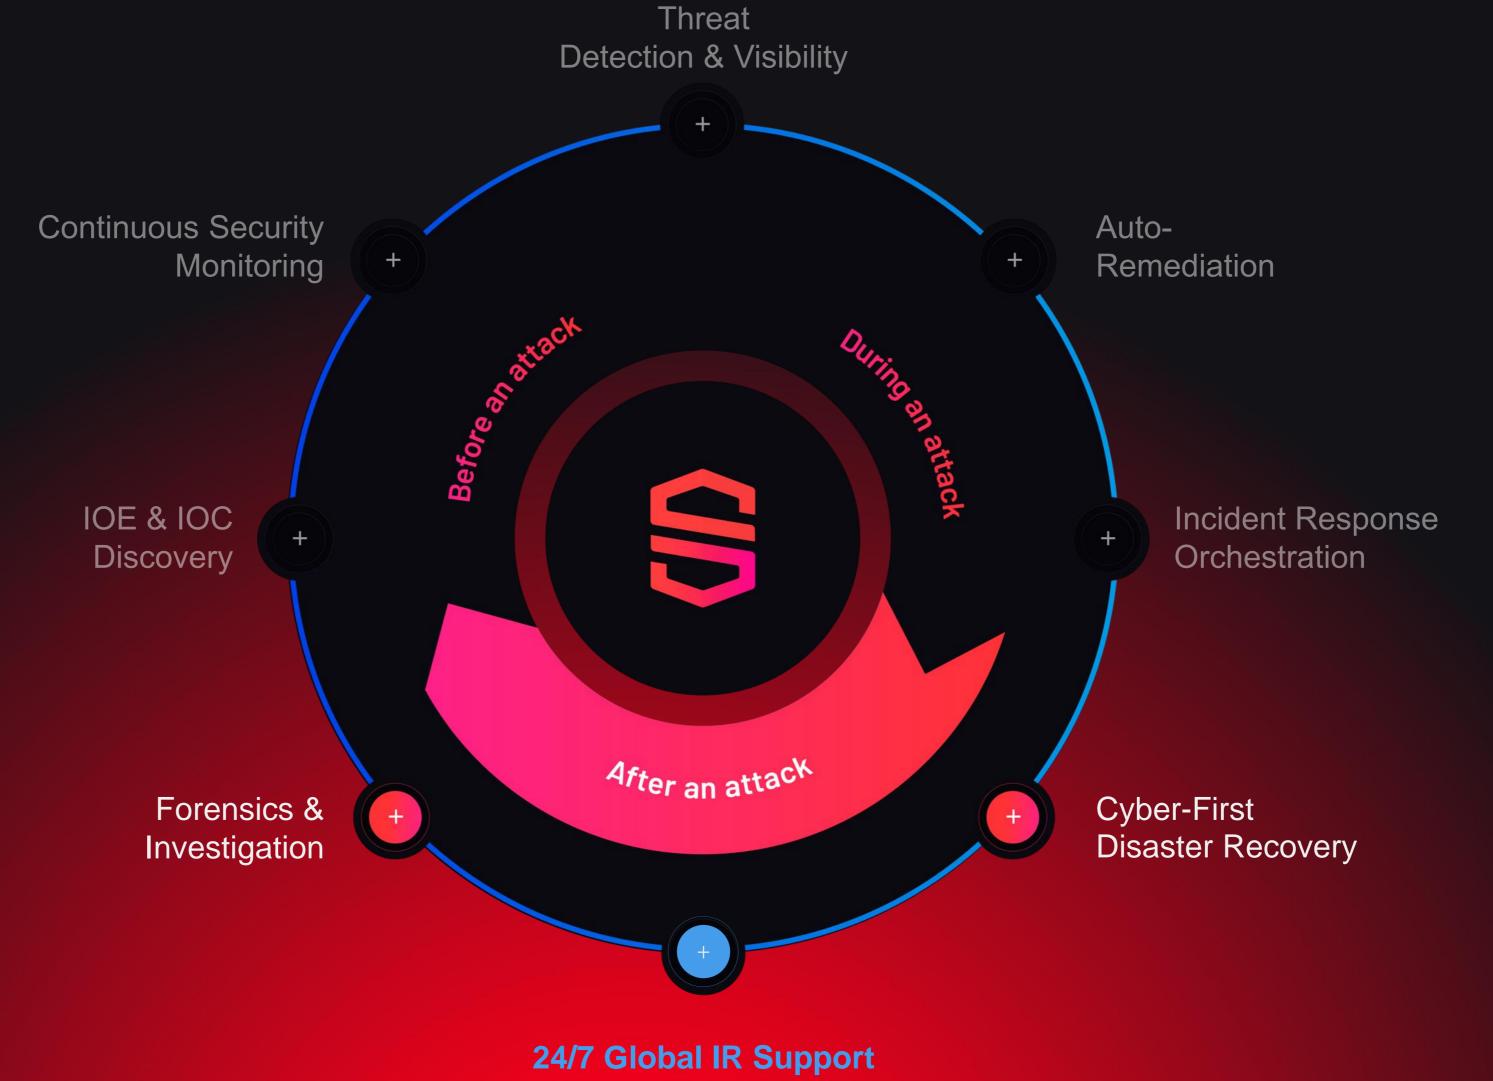

## DURING attack

24/7 Global IR Support

### POST attack

### Identity Resilience Platform

End to end resilience for your Microsoft Hybrid identity

#### **Active Directory Forest Recovery**

Cyber-first AD disaster recovery

ADFR is the only backup and recovery solution purpose-built for recovering Active Directory from cyber disasters. ADFR fully automates the AD forest recovery process, reduces downtime, eliminates risk of malware reinfection, and enables post-breach forensics.

#### **Directory Services Protector**

Hybrid AD threat prevention, detection, and response

Directory Services Protector (DSP) is a Gartner-recognized identity threat detection and response (ITDR) solution that puts hybrid Active Directory security on autopilot with continuous monitoring and unparalleled visibility across on-premises AD and Entra ID environments, tamperproof tracking, and automatic rollback of malicious changes.

#### **Disaster Recovery for Entra Tenants**

Backup and recovery for Entra ID resources

Disaster Recovery for Entra Tenant (DRET) gives you secure, reliable backup services for critical Entra ID data, eliminating time-consuming storage management processes and ensuring fast post-attack recovery.

**#1 NEW TARGET** 

Identity Threat Detection and Response (ITDR) is a Gartner "top trend" for cybersecurity

"While organizations understand the criticality of AD, the security of AD is often overlooked. If AD is breached, an attacker gets virtually unrestrained access to the organization's entire network and resources. This makes AD a prominent high-value target for threat actors."

### Gartner

Emerging Technologies and Trends Impact Radar: Security

UNPARALLELED SUPPORT

### Breach preparedness & incident response

Semperis isn't just another security vendor but instead a true partner through and through

Security assessment & AD disaster recovery planning

Threat detection & mitigation

Incident response

Post-incident forensics

## Gartner recommends adding an AD-specific disaster recovery tool

Organizations without a useful backup system will be left with few options but to pay the ransom."

#### Gartner

How to Protect Backup Systems from Ransomware

"Accelerate recovery from attacks by adding a dedicated tool for backup and recovery of Microsoft Active Directory."

"Tools from vendors such as ...Semperis... offer a more complete backup and recovery platform for Active Directory than those found in the Active Directory backup modules included in most enterprise backup software."

**Gartner: How to Protect Backup Systems from Ransomware** 

"If Active Directory isn't **cleaned and secured** before applications are brought back online, there is a high risk that attackers will quickly regain control of recovered applications."

"Maintain regular backups of Active Directory in a secure location, such as data vault and practice the recovery process. If the budget allows, add Active Directory-specific backup tools to **simplify and speed up the process."** 

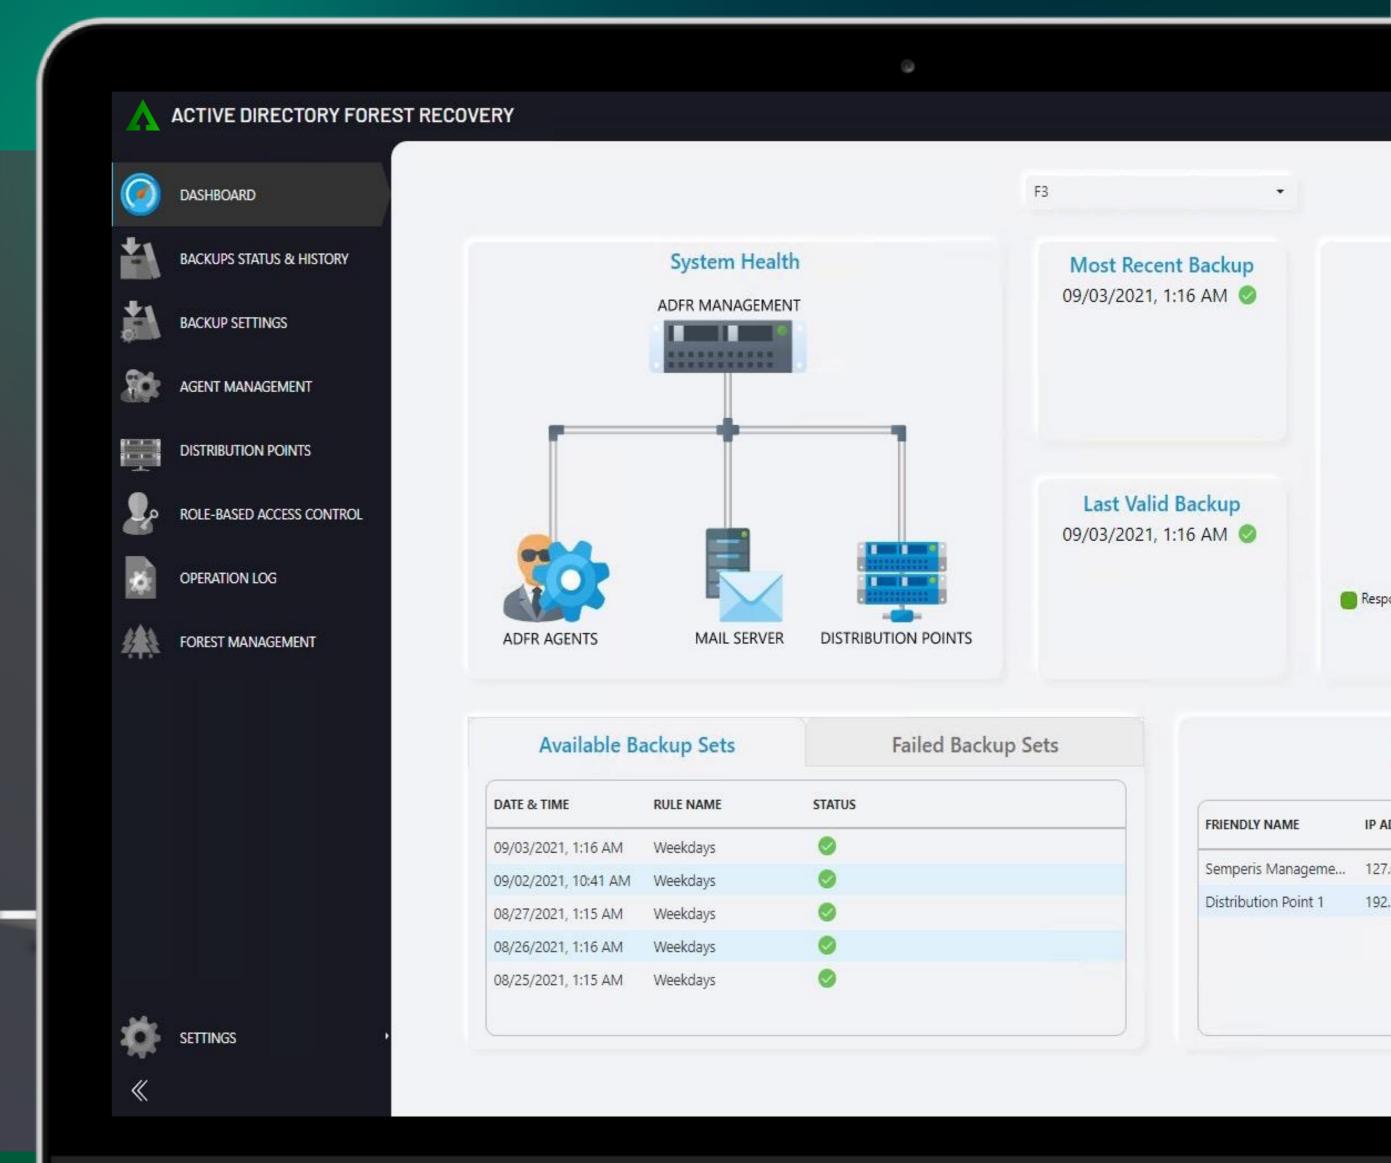

Gartner: Restore vs. Rebuild – Strategies for Recovering Applications After a Ransomware Attack

#### AD FOREST RECOVERY

## Shorten forest recovery by 90%

- Clean restore (malware free)
- Rapid recovery
- Advanced automation
- Anywhere recovery
- Post-attack forensics (AD anti-virus)

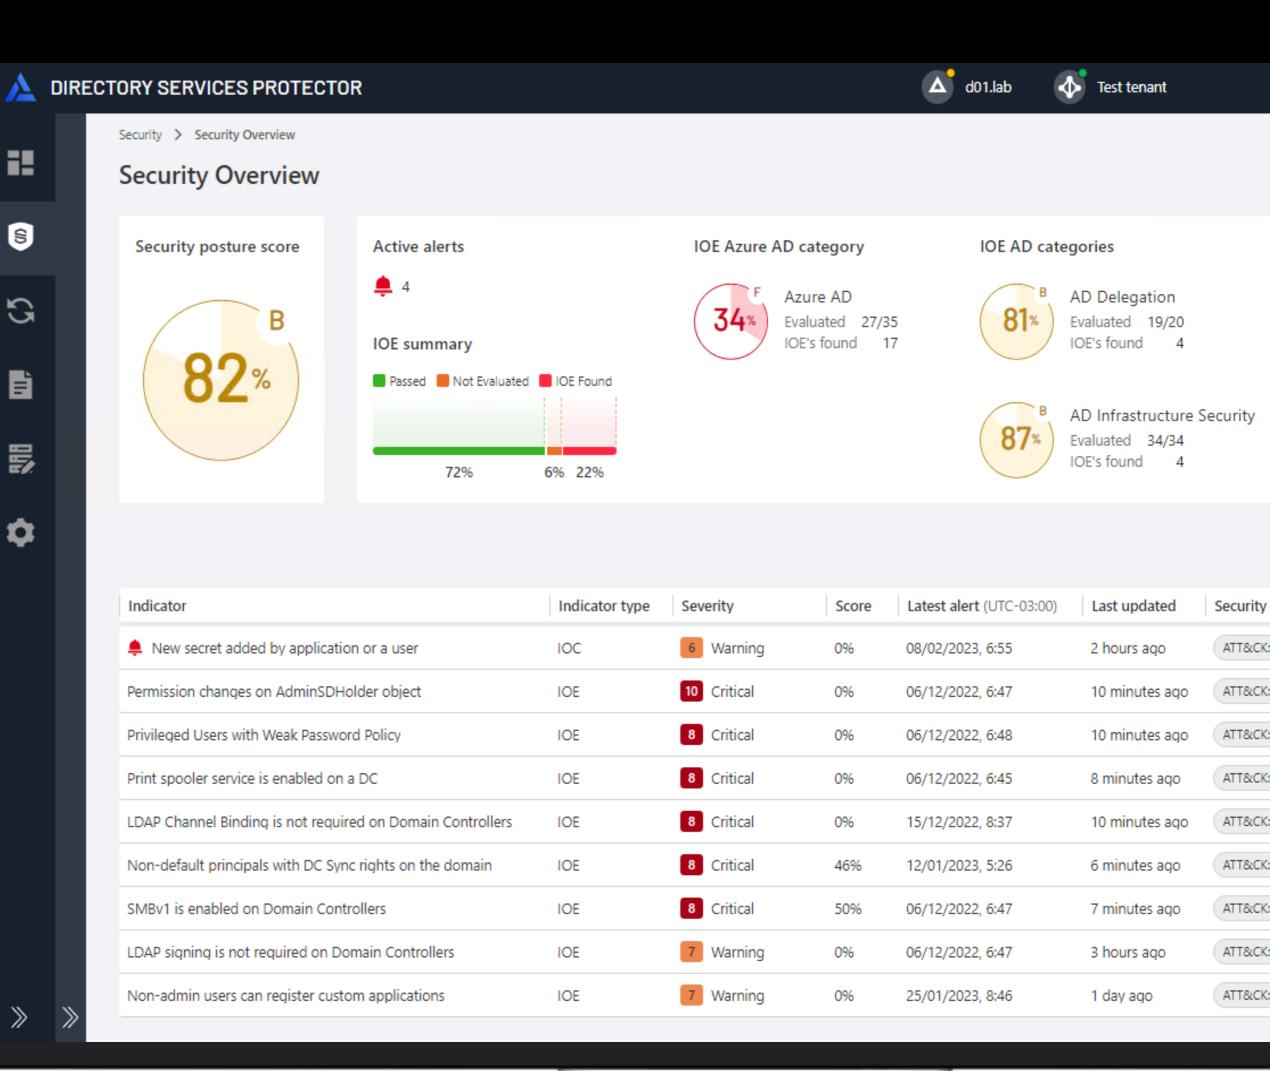

#### **DIRECTORY SERVICES PROTECTOR**

## Prevent, detect, & respond

- Continuous vulnerability assessment
- Tamperproof tracking
- Real-time security alerts
- Auto-remediation (malicious change rollback)
- Compliance reporting

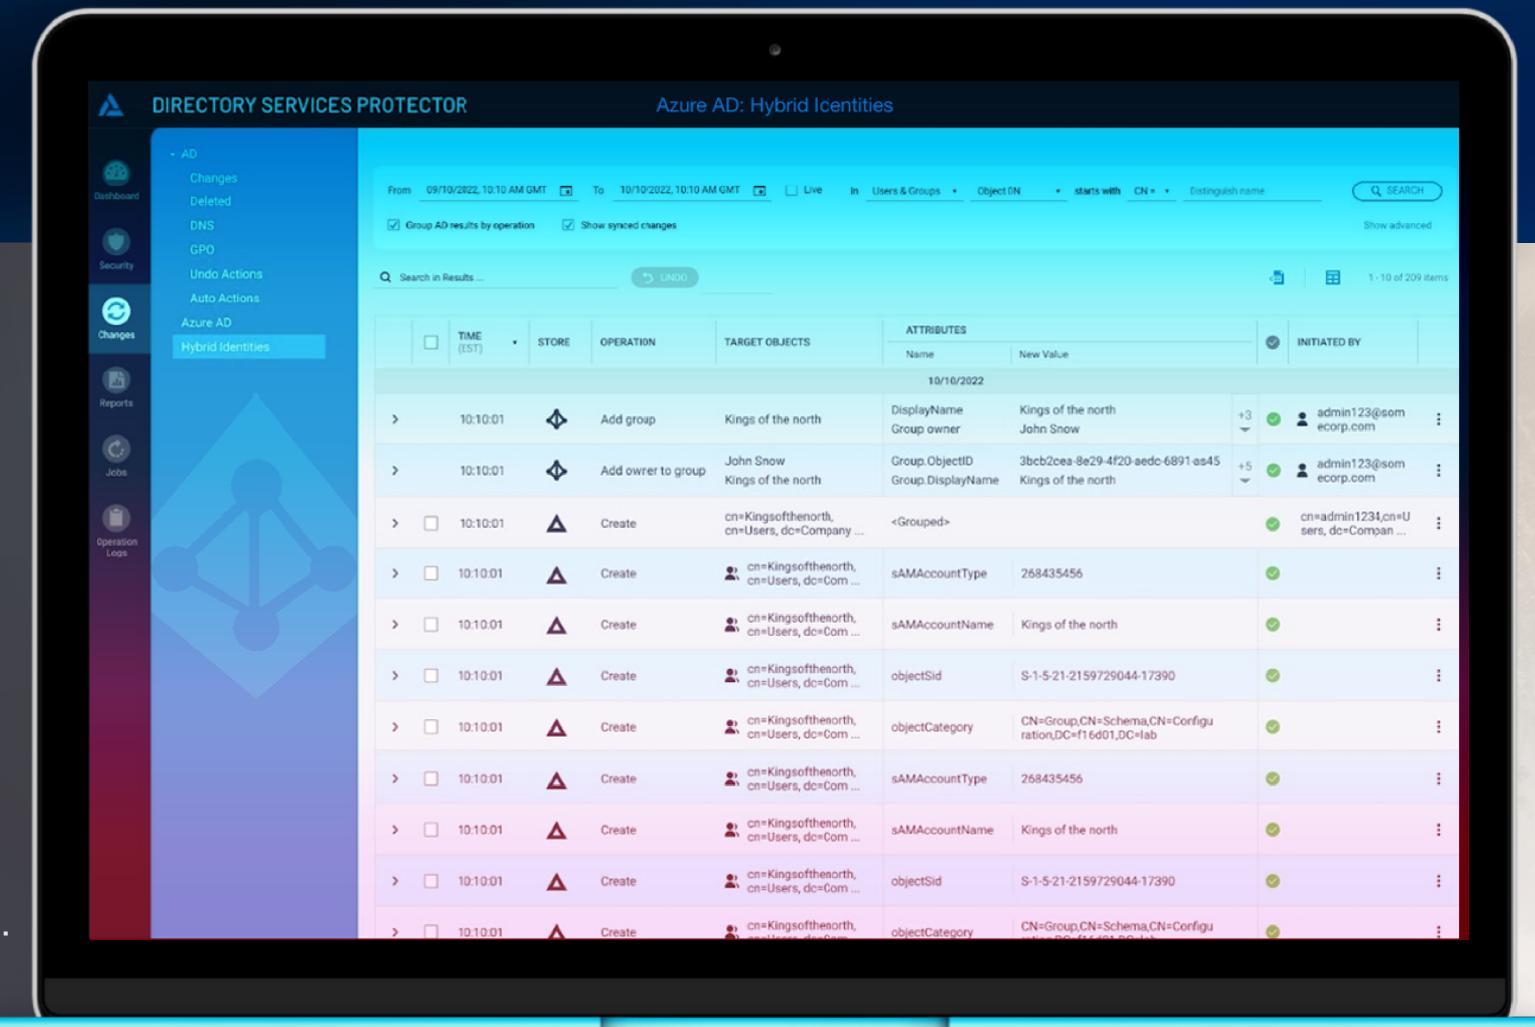

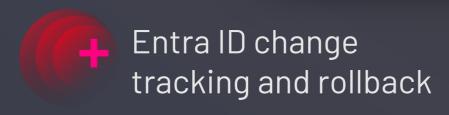

**DIRECTORY SERVICES PROTECTOR** 

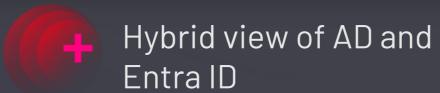

# Extend identity protection to Entra ID

Without seeing the complete picture, hybrid AD attacks fly under the radar. You need visibility into threats across AD and Entra ID.

Prevention, detection, and response all in one console.

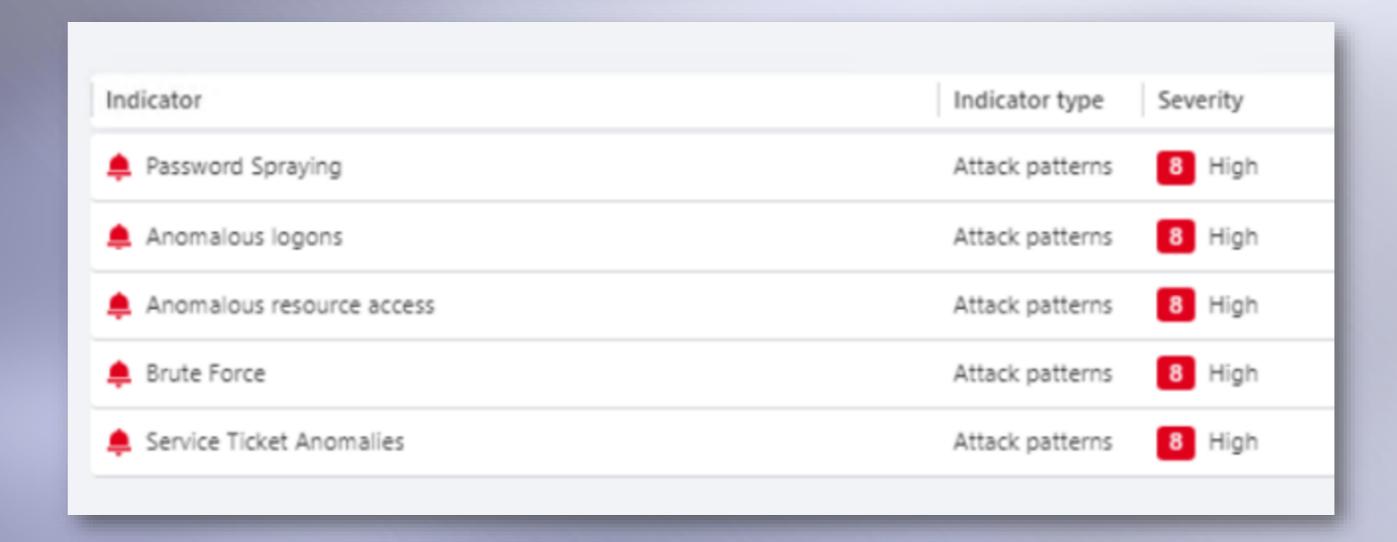

#### **IDENTITY RUNTIME PROTECTION**

Powered by Lightning

#### ML-powered, expertbuilt live attack pattern detection

Lightning IRP helps organizations reduce cyberattack risk and save response time by providing live detection of attack patterns that could signal an impending attack

- Reduce attack noise to focus on true threats
- Detect dangerous attack patterns such as password spray attacks, brute force attacks, and service ticket anomalies
- Accelerate response time and reduce cyberattack risk

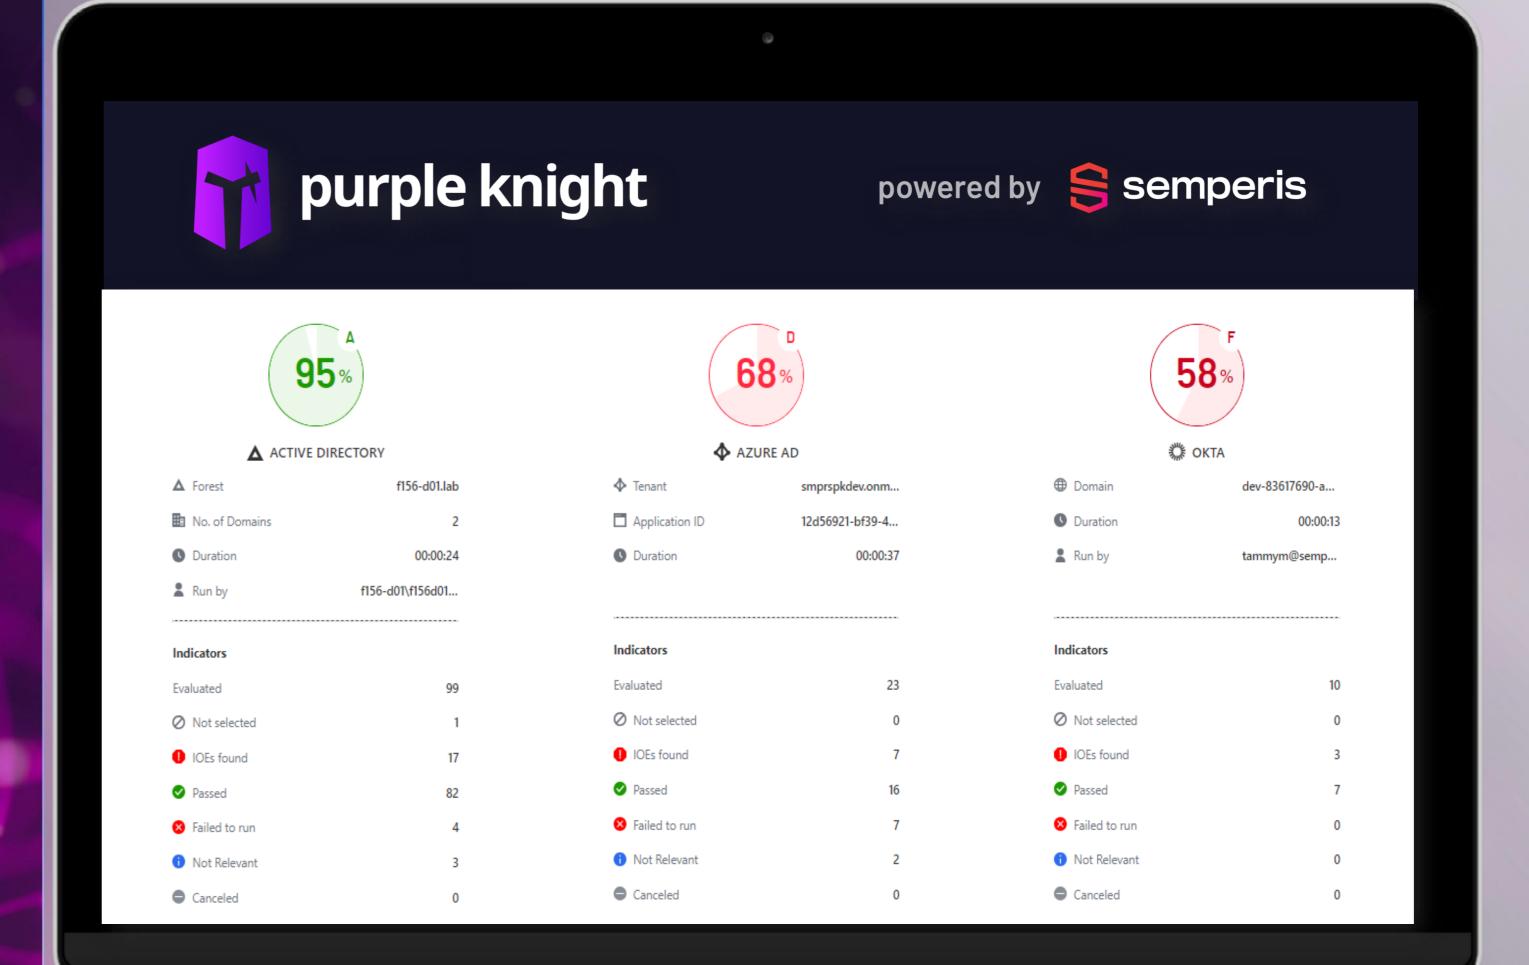

**MEET PURPLE KNIGHT** 

## Spot weaknesses before attackers do

Get the #1 community hybrid AD security assessment tool

- **20,000+** downloads
- 150+ security indicators
- 45% attack surface reduction

THANK YOU
