

A GIFT FROM US TO YOU!

Thank you for attending the Zimperium Keynote and the SIA Sessions during the Trellix EMEA Security Summit in Barcelona.

Every day the number and range of methodologies and malicious programs hackers use to gain unauthorized access to mobile applications and confidential information increases. Is your mobile app protected from these hackers?

For a limited time, Zimperium and Trellix are offering a free mobile app risk assessment where we will analyze the mobile app of your choice and identify:

- App Permissions Summary
- Compliance Summary
- OWASP Summary
- Security Risks Summary
- Privacy Risks Summary
- App Analysis
- Local Frameworks Used
- Network Communications Summary

Step 1: Scan the above **QR Code** or click this **link** (<https://get.zimperium.com/zscan-trial-request-trellix/>) and leave your **business e-mail**

Step 2: We'll contact you to verify the mobile **app of your choice**

Step 3: You will receive a **detailed technical pdf report** on the mobile app of your choice
