Trellix

SOLUTION BRIEF

Trellix Endpoint Security Suite

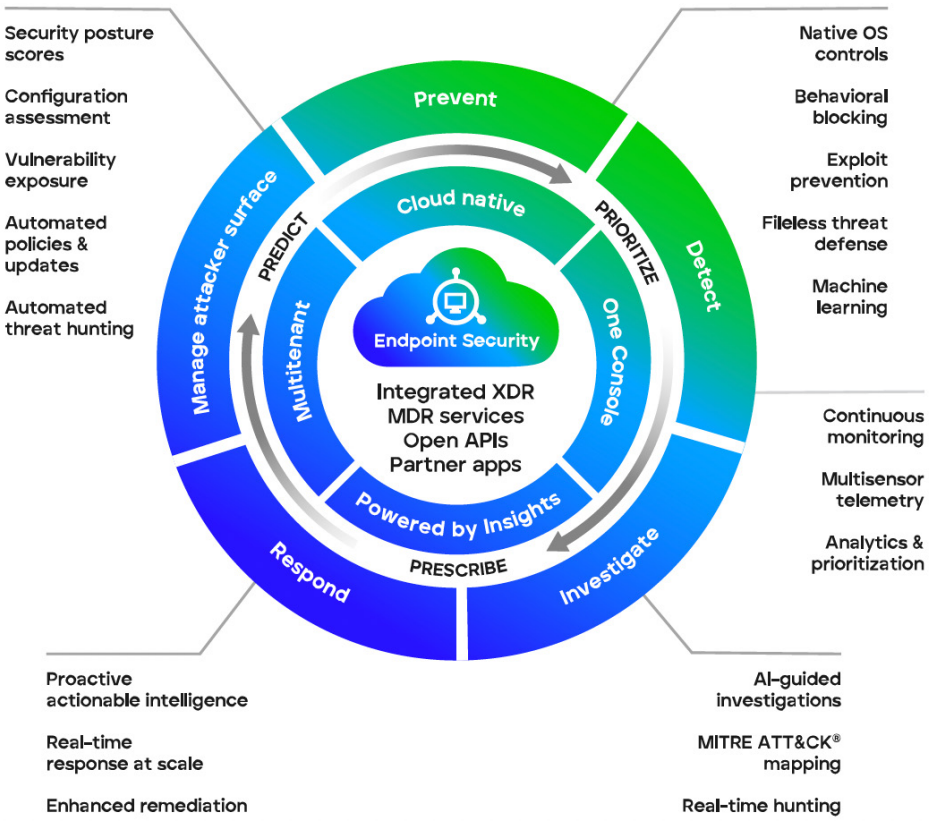
Future-proof your defenses with intelligent endpoint security and integrated XDR

The Trellix Endpoint Security Suite is a flexible, unified solution that protects devices and endpoints at the network edge, empowering your organization to address complex, distributed security issues thoroughly, efficiently, and quickly. It uses analytics and machine learning to achieve industry-leading effectiveness, all while offering the flexibility to connect to products from other vendors. The solution helps you unify your data and threat defenses from device to cloud, for integrated security.

As Trellix unifies data and threat defense from device to cloud, we are building a future where security is an integrated system—simpler, smarter, and broader than anything that's ever come before. The Trellix Endpoint Security Suite learns and evolves to protect your changing business needs in a dynamic threat landscape.

The Trellix Endpoint Security Suite includes Trellix Endpoint Security and Trellix Endpoint Detection and Response.

Future-proof your defenses with intelligent endpoint security and integrated XDR



Prevent, detect, investigate, and respond to threats while efficiently managing your attack surface. We help you predict, prioritize, and prescribe your most effective threat response using integrated extended detection and response (XDR), managed detection and response (MDR) services, open APIs, and partner applications.

Support your remote workforce with industry-leading endpoint security and a unified defense, along with comprehensive, proactive threat intelligence and defenses across the entire attack lifecycle.

Trellix Endpoint Security Suite is an integrated suite of technologies that uses analytics and machine learning to provide effective protection—including the flexibility to connect to security products from other vendors.

Key benefits

Comprehensive endpoint protection from advanced threats

Trellix Endpoint Security learns and evolves to protect your organization in a dynamic threat landscape. Use its robust threat prevention, detection, investigation, and response capabilities to proactively guard against threats and gain visibility and control of all your endpoints.

Simplified management with a centralized console

Speed and streamline your security effectiveness while easily scaling across hundreds of thousands of endpoints. Trellix Endpoint Security offers a single view where you can access automated workflows from anywhere. See at a glance what you need to focus on first. With a single console you save time, eliminate gaps, and simplify management.

Proactive risk management to keep you ahead of adversaries

Stay ahead of attacks with proactive prioritization of threats, and preempt attacks before they occur. Gain high-priority actionable threat insights in minutes instead of weeks. Use predictive assessment of your security posture to find potential security gaps. Preview how your company would perform in an attack scenario—and see how this compares to other organizations.

Get adaptive, proactive defenses with intelligent endpoint protection and integrated XDR

Comprehensive endpoint protection from advanced threats

Gain visibility and control of all your endpoints with robust threat prevention, detection, and response:

- Protect against emerging and advanced threats, including ransomware, while securing your remote workforce with powerful threat detection and response
- Simplify investigations, improve analyst productivity, and save time with AI-guided investigations

Simplified management with a centralized console

Easily scale and manage hundreds of thousands of endpoints to:

- Streamline and accelerate your security effectiveness while easily scaling across hundreds of thousands of endpoints to eliminate security gaps
- Enforce and manage security from a single view and access automated workflows from anywhere

> In our environment, the Trellix integrated ecosystem replaced seven different security tools and six vendors' management consoles. The difference in ease of management was night versus day."
>
> — M.T., information security analyst at a major American convenience store chain

Proactive risk management to stay ahead of adversaries

Use our solution capabilities to help protect your organization, so you can:

- Manage your attack surface and preempt attacks
- Proactively prioritize threats with advance knowledge of those targeting your industry or geographic location
- Use predictive security assessments and proactively prescribe security actions

Complete and proactive endpoint protection

Prevent security breaches with enhanced remediation

Uncover and protect against fileless and script-based attacks while defending against ransomware, greyware, and credential theft attacks with enhanced remediation and dynamic application containment technologies.

Get actionable threat intelligence with machine-learning behavior classification to detect zero-day threats in near real time.

Quickly detect advanced and emerging threats

Simplify detection and response for sophisticated advanced persistent threats (APTs) with integrated endpoint detection and response (EDR) controls. Reduce dwell time by empowering analysts to accurately and quickly detect, investigate, and respond to attacks.

Accelerate threat detection and containment through MITRE ATT&CK® tactic and technique alignment.

Use automation and AI to accelerate threat investigations

Harness threat and artificial intelligence to improve efficacy, minimize false positives, and improve alert quality while securing endpoints at scale.

Cut though alert noise and enable your analysts to focus on high-priority alerts with automated investigations and guided alert triage.

Respond to threats with confidence and speed

With the Trellix Endpoint Security Suite you get proactive and dynamic investigation guides that adjust to the case at hand while orchestrating across endpoints to contain and stop threats in real time at scale. Our enhanced remediation capabilities save you valuable time otherwise spent reimaging systems.

Manage your attack surface with unparalleled threat intelligence

Use Trellix Insights* to intelligently preempt attacks with proactive threat prioritization, predictive assessments of your security posture, and preemptive security action prescriptions. Trellix Insights delivers prioritized risk intelligence on which threats and campaigns are most likely to target your organization, while Trellix Global Threat Intelligence enhances your situational awareness and helps you accurately understand the constantly changing risk landscape.

Orchestrate with a cloud-delivered, unified platform

Easily scale across hundreds of thousands of endpoints to meet business needs and remove security gaps. You can automate security and compliance workflows and accelerate responses with real-time sharing and trigger actions. When business needs require it, you can gain a unified view across all your security needs by extending protection across endpoints, network, and cloud.

Gain access to an extensive partner ecosystem for a unified defense

We collaborate with leading software vendors to improve security outcomes for our customers. Our open platform helps you integrate your existing security solutions easily. You also get fewer management consoles for a more streamlined, automated experience.

SOLUTION BRIEF

Trellix Endpoint Security Suite components

Industry recognition

- Trellix was named a market leader in the 2021 Gartner Magic Quadrant for endpoint protection platforms**
- The value of XDR technology was recognized in Gartner's Market Guide for Extended Detection and Response
- Trellix Endpoint 10.7 achieved a perfect score in AV-TEST in 2020**
- Trellix was a gold winner in the 2021 Cybersecurity Excellence Awards for endpoint security**
- Trellix was awarded a 2020 Cybersecurity Breakthrough Award for Endpoint Security Solution of the Year**
- Trellix was named "Most Innovative and Scalable Endpoint Security Company" by Cyber Defense Magazine in 2020**

* Trellix Insights requires Trellix Endpoint Security telemetry (opt-in) to function properly; if you do not want to provide this telemetry, you should not choose this product, as you won't be able to receive full value

** Awarded to McAfee, now doing business as Trellix

Trellix Endpoint Security (ENS)

The endpoint solution you depend on should align with the priorities that matter most to you. Regardless of your role, Trellix Endpoint Security aligns to your specific critical needs—from preventing threats and hunting them to tailoring security controls. Use the solution to ensure system uptime for users, find more opportunities for automation, and simplify complex workflows.

Trellix Endpoint Detection and Response (EDR)

Trellix EDR helps reduce alert fatigue by empowering analysts of all skill levels to improve productivity and investigate more effectively, while continuously monitoring and gathering data to provide the visibility and context needed to detect and respond to threats.

Unique to the Trellix EDR solution is Trellix Insights, which lets you proactively prioritize threats, predict whether your existing tactics will stop them, and prescribe effective countermeasures.

About Trellix

Trellix is a global company redefining the future of cybersecurity and soulful work. The company's open and native extended detection and response (XDR) platform helps organizations confronted by today's most advanced threats gain confidence in the protection and resilience of their operations. Trellix, along with an extensive partner ecosystem, accelerates technology innovation through machine learning and automation to empower over 40,000 business and government customers with living security.
