How to Use the Report

Info-Tech’s Data Quadrant Reports provide a comprehensive evaluation of popular products in the Data Loss Prevention market. This buyer’s guide is designed to help prospective purchasers make better decisions by leveraging the experiences of real users.

The data in this report is collected from real end users, meticulously verified for veracity, exhaustively analyzed, and visualized in easy to understand charts and graphs. Each product is compared and contrasted with all other products in the category to create a holistic, unbiased view of the product landscape.

Use this report to determine which product is right for your organization. For highly detailed reports on individual products, see Info-Tech’s Product Scorecard.

This report is available free of charge for internal use only to assist with software evaluation and selection. Sharing, republishing, distributing, or otherwise copying any portion of this report without the express written consent of SoftwareReviews.com is strictly prohibited.

SOFTWARE REVIEWS

Data Quadrant

Assess vendor and product performance at a glance and use the SoftwareReviews Data Quadrant to identify which products and vendors are leading the pack and which are trailing.

DATA LOSS PREVENTION

The Software Reviews Data Quadrant evaluates and ranks products based on feedback from IT and business professionals. The placement of a software in the Data Quadrant indicates its relative ranking as well as its categorization.

The Complete Software Experience

When distilled down, the software experience is shaped by both the experience with the software and the relationship with the vendor. Evaluating enterprise software along these two dimensions provides a comprehensive understanding of the product and helps identify vendors that can deliver on both.

Product Features and Satisfaction

The satisfaction is captured in the overall satisfaction score, which is driven by the likelihood of users to recommend the software, combined with user satisfaction across top product features.

Vendor Experience and Capabilities

The vendor relationship is calculated in a weighted average of the satisfaction scores tied to vendor capabilities (e.g. software implementation, training, customer support, product roadmap) as well as emotional response ratings toward the vendor (e.g. trustworthy, respectful, fair).

Note: The axes ranges are dynamically adjusted based on minimum and maximum values in the dataset.

Category Overview

This page provides a high level summary of product performance within the Data Loss Prevention category. Products are ranked by a composite satisfaction score (Composite Score) that averages four different areas of evaluation: Net Emotional Footprint, Vendor Capabilities, Product Features, and Likeliness to Recommend. The Net Emotional Footprint Score measures user emotional response ratings of the vendor (e.g. trustworthy, respectful, fair).

Use this data to get a sense of the field, and to see how the products you’re considering stack up.

RANK	PRODUCT	COMPOSITE SCORE	NET EMOTIONAL FOOTPRINT	NET EMOTIONAL FOOTPRINT DISTRIBUTION	VENDOR CAPABILITIES	PRODUCT FEATURES	LIKELINESS TO RECOMMEND	NUMBER OF REVIEWS

Vendor Capability Satisfaction

Vendor Capabilities

This table lists and briefly describes all vendor capabilities that are evaluated in the Data Loss Prevention software category. For your convenience, you will also find longer descriptions of the capabilities under the capability subheadings in the subsequent pages.

Business Value Created	The underlying purpose of software is to create value for employees, customers, partners and ultimately shareholders. As a result, it is imperative that any software selection be aligned with the organization’s needs and deliver enough business value to justify the cost. The data below highlights the satisfaction level associated with the business value derived from various product offerings. Use this information to identify the software that consistently creates business value for its customers.
Breadth of Features	Users prefer to work with feature rich software that enables them to perform diverse series of tasks as opposed to one they find restrictive. The data below highlights the satisfaction level associated with the breadth of features from various product offerings. Use this information to identify which software offers valuable comprehensive functionality that extends beyond the basic level.
Quality of Features	Feature quality is just as important as quantity. Software needs to do what you’re purchasing it to do, easily, intuitively, reliably, and effectively. Use the data in this section to gauge whether or not a product follows through on the marketing hype by delivering high quality features.
Product Strategy and Rate of Improvement	Purchasing software can be a significant commitment, so it’s important to know if your vendor is serious about the need for constant improvement and deliberate strategic direction. Vendors who don’t stay on top of emerging needs and trends won’t enable you to meet your business goals. Use the data in this section to separate innovators from imposters.
Usability And Intuitiveness	End user learning curves cost the organization money. Pay attention to your end users’ technical ability to determine how important UX is in your purchase.

This section provides detailed information on user satisfaction for each vendor capability regarding their product offering(s). Use these pages to dig deeper into areas of particular interest or concern.

Vendor Support

The importance of vendor support will vary for each organization depending on internal capabilities, but there will always be issues that only the vendor can resolve. Use the data in this section to see which vendors tend to under-service their product and which will offer quality support.

Ease of Data Integration

The ability to integrate with other systems is increasingly important; without this, manual data loading and extraction can be time-consuming and prone to error. Use this section to see which vendors will cause headaches and which will make data integration easy.

Ease of Administration

Administrative interfaces don’t get the same attention as those built for end users, but they shouldn’t be clunky or unintuitive. Use the data in this section to determine which vendors make administration easy, so that your IT personnel can resolve issues and perform configurations efficiently and effectively.

Ease of Customization

Out-of-the-box functionality often isn’t enough, especially for niche or industry-specific software, and the reason you’re buying rather than building is to save time and money in the first place. Don’t get bogged down in a difficult customization; use the data in this section to make sure you can easily achieve the functionality you need for your particular situation.

Availability and Quality of Training

Effective and readily available training enables users to get the most out of the software you’ve chosen. Use this section to make sure your vendor’s training programs and materials measure up.

Ease of Implementation

Choosing the right software is only the first step. Successfully implementing the new solution is necessary in order to realize its full value and promote end user adoption. Use the data in this section to determine which software is easy to implement, and which may jeopardize your goals by causing trouble in this stage.

Vendor Capability Satisfaction

This section provides detailed information on user satisfaction for each vendor capability regarding their product offering(s). Use these pages to dig deeper into areas of particular interest or concern.

Business Value Created

Vendor Capability Satisfaction

This section provides detailed information on user satisfaction for each vendor capability regarding their product offering(s). Use these pages to dig deeper into areas of particular interest or concern.

Vendor Support

The importance of vendor support will vary for each organization depending on internal capabilities, but there will always be issues that only the vendor can resolve. Use the data in this section to see which vendors tend to under-service their product and which will offer quality support.

<div> VEEAM AVAILABILITY SUITE TOP PRODUCT</div>		<div><div>Delights</div><div>Highly Satisfies</div><div>Almost Satisfies</div><div>Disappoints</div></div> <div><div><div><div><div><div></div><div></div><div></div><div></div><div></div><div></div></div><div></div><div></div><div></div><div></div><div></div><div></div></div><div></div><div></div><div></div><div></div><div></div><div></div></div><div></div><div></div><div></div><div></div><div></div><div></div></div><div></div><div></div><div></div><div></div><div></div><div></div></div> <div></div> <div></div> <div></div> <div></div> <div></div> <div></div>

--

This section provides detailed information on user satisfaction for each vendor capability regarding their product offering(s). Use these pages to dig deeper into areas of particular interest or concern.

The ability to integrate with other systems is increasingly important; without this, manual data loading and extraction can be time-consuming and prone to error. Use this section to see which vendors will cause headaches and which will make data integration easy.

Vendor Capability Satisfaction

This section provides detailed information on user satisfaction for each vendor capability regarding their product offering(s). Use these pages to dig deeper into areas of particular interest or concern.

Ease of Administration

Administrative interfaces don't get the same attention as those built for end users, but they shouldn't be clunky or unintuitive. Use the data in this section to determine which vendors make administration easy, so that your IT personnel can resolve issues and perform configurations efficiently and effectively.

Vendor Capability Satisfaction

This section provides detailed information on user satisfaction for each vendor capability regarding their product offering(s). Use these pages to dig deeper into areas of particular interest or concern.

Ease of Customization

Out-of-the-box functionality often isn't enough, especially for niche or industry-specific software, and the reason you're buying rather than building is to save time and money in the first place. Don't get bogged down in a difficult customization; use the data in this section to make sure you can easily achieve the functionality you need for your particular situation.

Vendor Capability Satisfaction

This section provides detailed information on user satisfaction for each vendor capability regarding their product offering(s). Use these pages to dig deeper into areas of particular interest or concern.

Availability and Quality of Training

Effective and readily available training enables users to get the most out of the software you’ve chosen. Use this section to make sure your vendor’s training programs and materials measure up.

Product Feature Satisfaction

This section provides detailed information on user satisfaction for each product feature. Use these pages to dig deeper into areas of particular interest or concern.

Product Features

This table lists and describes all the features that are evaluated in the Data Loss Prevention software category. For your convenience, these descriptions are repeated under the feature subheadings in the subsequent pages.

Mandatory Features	
Centralized Reporting Engine	The solution provides a central reporting engine for policy creation and management with canned reports and RBAC.
Customizable and Pre Canned Policies	Centralized reporting engine with out-of-the-box policy support and custom policy creation with bi-directional workflow integration.
Data Discovery (DLP)	Structured (content registration or data fingerprinting) and unstructured (keywords, lexicons, metadata tags, statistical analysis, etc.) data identification.
Standard Features	
Activity Monitoring Alerts	User access patterns can be monitored with rule-based alerts for sensitive data access requests.
Email and IM Support	The solution scans inbound and outbound messages for security violations.
Differentiating Features	
Application Monitoring	The solution monitors applications which may store sensitive data (e.g. clipboard).

Endpoint Support	Multiple operating system and device type support with offline protection, removable media, print screen, and copy and paste support.
Forensic Analysis Support	Query capabilities with pre-built and custom drill down, pivot, and parsing; includes export functions and event session reconstruction.
Multiple Enforcement Actions	The solution provides options for violations such as block, move, quarantine, and delete.
Real Time Scanning	The solution scans content and context of files in real-time, 24/7.
Encryption and Decryption Support	Support for real-time decryption and re-encryption of information.
Environment Support	Breadth of protocol support, cloud protection, peer to peer, Web 2.0, and virtualization environment support.
Network Access Control Integration	The solution supports integration with common NAC providers.
Optical Character Recognition	Optical Character Recognition (OCR) capabilities to accurately extract text from contract images.
